Understanding the Information

"We are able to investigate the claim, ask questions, and understand what is required in order to move forward with any benefit entitlements while taking away the claimant's opportunity to attempt to change or misunderstand the information."

Karen Kumpf, Risk Manager, OLV Homes

When was the last time *your* TPA came to you with an innovative recommendation to improve your claim management techniques? Or do they stay with stale processes and procedures? At EM Risk Management, we're not afraid to be an industry leader... and our results prove it!

Expedited claims through coordinated investigation

We start by bringing the employer and injured worker together via a conference call. Having both parties on the phone at the same time not only helps to expedite the claim, but also helps the employee better understand the return-to-work opportunities and discourages fraud.

Our clients see the immediate value of this collaborative process. From the time a claim is filed, the employer and injured worker are on the same page regarding expectations, EM Risk Management's role and next steps.

EM Risk Management, A POMCO Company, is committed to offering self-insured employers the best in workers' compensation/disability solutions.
